

Quick Start Guide

The 5G Cellular Gateway offers next-generation wireless utility management with a simple plug-and-play setup. It connects thousands of devices on a property and securely links to the internet via Ethernet, WiFi, or built-in 5G cellular.

Package Contents

A) GW4

B) Mounting Plate

C) Sheetrock Anchors & Screws

D) Ethernet Cable

E) Power Supply

F) 5G Cellular Antenna

NextCentury RF Connect™ Technology

NextCentury RF Connect™ wireless technology ensures secure, reliable communication, even in challenging environments. Its long-range 900MHz radios and smart frequency hopping reduce interference, while bi-directional encryption keeps data private.

Installation

Where to Install

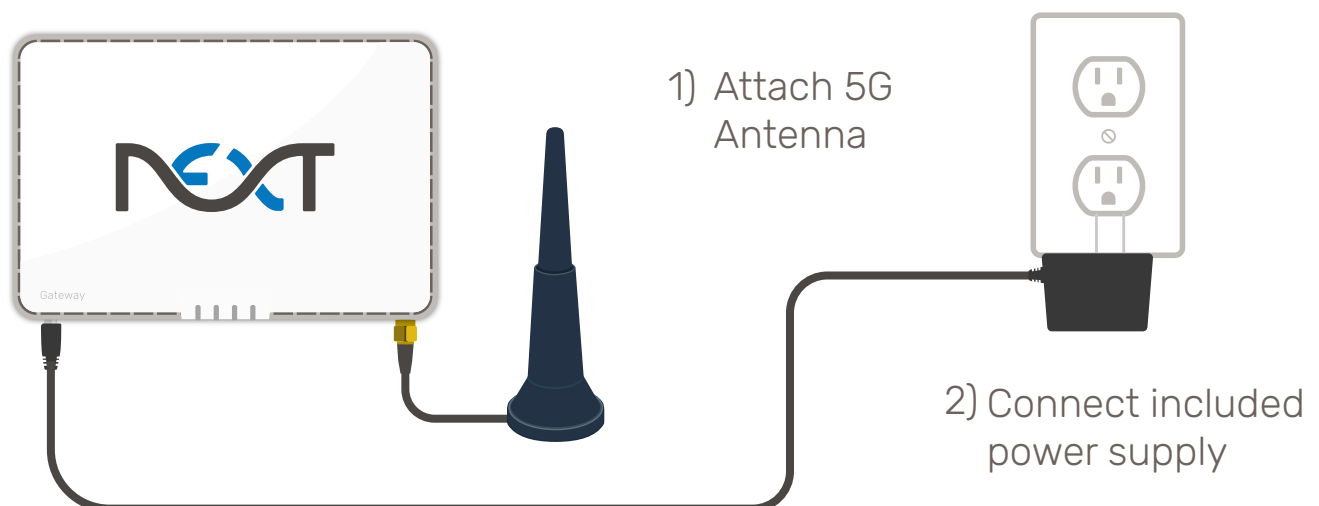

Where possible, select installation locations:

- Away from immediate obstructions (i.e. network racks, metal doors)
- Not directly mounted on metal supports or beams

Mounting On Wall

Connect to Power

Internet Connection

Ethernet

Connect the provided ethernet cable to the Gateway and a data port coming from a router or network switch. The Power LED will turn **blue** once online.

WiFi

Use the Direct Connect tool in the NextCentury Mobile App (NCSS) and connect to your Gateway.

- Select the Configure button
- Tap on “Select Network” under the WiFi section
- Select your WiFi network and enter the password

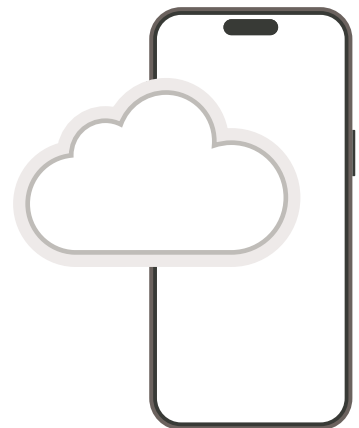

Once connected and online, the Power LED will turn **blue**.

Cellular

To begin monthly service, select the “Enable Cellular” toggle on the website or mobile app, activating a simple no-contract cellular service.

Cellular Signal LED will indicate if a connection is available

After enabling and online, the Power LED will turn **blue**

Direct Connect

Log into the NextCentury Mobile App (NCSS), open the menu, and select Direct Connect. Choose your Gateway from the nearby devices list. Once connected, access to advanced setup options is available.

Verification
